

Radiation Protection Design Guidelines For 0.1-100 MeV Particle Accelerator Facilities: Recommendations Of The National Council On Radiation Protection And Measurements

by National Council on Radiation Protection and Measurements

Radiation protection design guidelines for 0.1-100 MeV particle In this work, we carried out measurements of skyshine photon dose rates produced from . When the air above the roof of a radiotherapy facility room scatters the primary . 1 National Council on Radiation Protection and Measurements. Radiation protection design guidelines for 0.1–100 MeV particle accelerator facilities. NCRP Report No. 144, Radiation Protection for Particle Accelerator Radiation Protection Design Guidelines for 0.1-100 MeV Particle 51, Radiation protection design guidelines for 0.1–100 MeV particle accelerator facilities National Council on Radiation Protection and Measurements, Radiation protection design guidelines for 0.1-100 MeV particle accelerator facilities: recommendations of the National Council on Radiation Protection and Volume 51 of National Council on Radiation Protection and Measurements: NCRP Appendix O Environmental Health and Safety - McGill University
